A Fortis Insurance Company HSA Plan – Savings and Insurance in One

This example is based on the average health insurance premium of an individual with a family of four living in a metropolitan area, covered medical expenses totaling \$1,500, and \$550 in expenses for dental care, contacts and eyeglasses. Health insurance premiums vary substantially based on age, geographic location and other variables. Federal tax savings calculations assume that contributions are deducted from federal taxes. Withdrawals for non-qualified expenses prior to the age of Medicare eligibility are subject to a 10% penalty by the IRS.
